

Using Nutrislice with Amazon Alexa

Set Up

1. Enable the [skill](#) via your Amazon [Alexa app](#).
2. Open the skill by saying “Alexa, open School Menus” or “Alexa, launch School Menus.”
3. Set your district by saying “My district is ____.”
4. Set your favorite school by saying “My school is ____.”
Now that Alexa knows which school you want the menu for, you can ask her “what’s for lunch” each day.

Daily Use

To hear the menu for your default school, say: “Alexa, ask School Menus ‘What’s for <Menu> on <date>’?”

Examples:

- *Alexa, ask School Menus what’s for breakfast?*
- *Alexa, ask School Menus what’s for lunch tomorrow?*
- *Alexa, open School Menus. What’s for lunch on Friday?*

Menus for Multiple Schools

Only 1 school can be set as the default school, so to get the menus for any other location, you will need to specify a school in your command.

Examples:

- *Alexa, ask School Menus what’s for breakfast at Jefferson High School?*
- *Alexa, ask School Menus what’s for lunch tomorrow at Roosevelt Middle School?*
- *Alexa, open School Menus. What’s for lunch at McKinley Middle School on Friday?*

Troubleshooting

If Alexa is unable to find your district or school:

1. Make sure you are saying the name exactly as it appears in the Nutrislice app
 - If you have already set your district, you can ask Alexa to list all the schools in it so you can hear how they are named.
2. Try spelling the name of your school or district.
