

## Cedar Rapids Community School District Facility Master Plan Process *Sustainability Definition*

### Committee District Level Discussion

Committee Meeting #13 was held on October 10, 2017. At this meeting, the committee participated in an activity designed to assist the committee in developing a definition of sustainability that would be used by the CRCSD Facility Master Plan Process.

### Committee Sustainability Definitions:

#### Sustainability is...

- ...decisions and actions that optimize academic, social, financial, and quality student -centered learning environments for the future
- ...future ready facilities offer a high-quality, student-centered experience through flexible, adaptable and innovative design
- ...economic and adaptive learning environments for students and communities
- ...maximizes current and future resources effectively and efficiently to ensure learner success
- ...optimizes resources to address emerging trends while adapting to ensure current and future learner success
- ...an adaptive plan that continues into the future and prioritizes effective use of resources and a quality learning and work environment
- ...an adaptable, student-centered approach to providing fiscally viable experiences which lead to optimal future-focused learning.
- ...Efficiently reinvest
- ...develop a student-centered resource for environmental, economic, and social issues.
- ...quality and safe environment
- ...optimizing resources to ensure success for all students.
